

Re: RM-10868

I ask the FCC to reject the Radio Amateur Foundation's petition RM-10868. The requirement for Morse Code is antiquated and serves no useful purpose in today's world. The Morse Code requirement prohibits many from joining the amateur HAM ranks; and this is a shame, since the more participants, the better to assist with emergencies and convey important information. Again, please reject Radio Amateur Foundation's petition RM-10868.
